

Notice to Garmin InReach renters:

The Alpine Club subscribes to a basic safety plan that allows for unlimited free SOS messages and preset messages (see * below). **If you choose to use additional features of the InReach** (including sending custom text messages to custom recipients, requesting your location, tracking your waypoints, or requesting weather reports), **you will be charged after returning the device according to the scheme below.** These charges allow us to continue renting the device cheaply to all of our users, most of whom simply use it as an emergency beacon.

Preset 2: "Stopping for the day."

Preset 3: "Delayed, but everything is OK."
